**[Internal Agency Docket No. FEMA-B-1233]**

**Proposed Flood Elevation Determinations**

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Proposed Rule; correction.

**SUMMARY:** On November 29, 2011 and November 9, 2012, FEMA published in the Federal Register a proposed rule and a correction to the proposed rule that contained erroneous tables. This notice provides corrections to those tables, to be used in lieu of the information published at 76 FR 73537 and 76 FR 67325. The table provided here represents the flooding sources, location of referenced elevations, effective and modified elevations, and communities affected for Sullivan County, Pennsylvania (All Jurisdictions). Specifically, it addresses the flooding sources Big Run, Little Loyalsock Creek, Loyalsock Creek, and Muncy Creek.

**DATES:** Comments are to be submitted on or before [INSERT DATE 90 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER].

**ADDRESSES:** You may submit comments, identified by Docket No. FEMA-B-1233, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and

**FOR FURTHER INFORMATION CONTACT:** Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064, or (e-mail) [Luis.Rodriguez3@fema.dhs.gov](mailto:Luis.Rodriguez3@fema.dhs.gov).

**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

#### **Correction**

In the proposed rule published at 76 FR 73537, in the November 29, 2011, issue

of the Federal Register, and in the proposed correction rule published at 76 FR 67325, in the November 9, 2012, issue of the Federal Register, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled “Sullivan County, Pennsylvania (All Jurisdictions)” addressed the flooding sources Big Run, Little Loyalsock Creek, Loyalsock Creek, and Muncy Creek. Those tables contained inaccurate information as to the location of referenced elevation, effective and modified elevation in feet, or communities affected for these flooding sources. In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.
